Beyond the Stack:

A March Chronicle

Edition: *March 2026*

Theme: *Evolution & Upskilling*

INSIDE, WE ALSO TALK ABOUT:

- The Appraisal Insight: Ownership & The AI Shift
- The New Standard: 30 Minutes of Daily Learning
- Expanding the Stack: Welcome Aboard!
- The March Pulse: Key Execution Highlights
- Process & Infrastructure: Fixing the Friction
- The April Horizon

Beyond the Stack

March was a month of taking stock—looking back at what we've built and looking forward to where we need to go. We are currently in the middle of our annual appraisal season. While we have completed many great 1-on-1 reviews, we still have a few pending that we will be wrapping up very soon.

These conversations are the most important part of our year. They aren't just about reviewing tasks; they are about understanding our people, identifying where we are growing, and preparing for the massive shifts happening in our industry.

The Appraisal Insight: Ownership & The AI Shift

If there is one major theme coming out of the March reviews, it is this: **Our team has incredible ownership**. Across Frontend, Content, Finance, and Design, you have consistently delivered without missing deadlines, even when faced with systemic roadblocks.
However, the appraisals also highlighted a critical shift in how we work. Across the board, we are seeing automation and AI take over routine execution:

- Our Content team is building reusable master AI prompts that reduce revision cycles.
- Finance is using VBA and automation to standardize roll-up reporting.
- QA is moving away from manual testing toward automation literacy.

> ***The takeaway is clear:*** *As AI takes over the heavy lifting of repetitive tasks, the value we bring is no longer just in "executing tasks." It is in system-level thinking, strategic problem-solving, and quality control.*

The New Standard: 30 Minutes of Daily Learning

With the landscape shifting so quickly, relying only on what we already know is not enough. Several of our appraisal discussions centered on this exact point: **learning must be a built-in part of our workday.**

To support this evolution, we are introducing a new standard: **Everyone is now required to spend a minimum of 30 minutes every day during working hours dedicated to upskilling.**

Whether it is learning advanced video editing techniques, exploring new AI prompting frameworks, mastering backend integrations, or understanding QA automation—this time is yours to grow. Learning is no longer something you have to squeeze in after hours; it is a core responsibility of your role.

Expanding the Stack: Welcome Aboard!

We are thrilled to welcome **Visveshwar** to the team as a **Senior Finance Executive.** Visveshwar brings a strong finance background with experience across multiple freelancing engagements and was previously associated with us through ComplyQ. As part of the CA fraternity, he adds solid domain expertise to our function. He will be aligned with the **Liv Indy** process, working closely with Nithiya and the team. Welcome aboard!

The March Pulse: Key Execution Highlights

While our focus is heavily on growth and infrastructure right now, the team still moved mountains this month. Here are the highlights:

- ***Finance & Operations:*** *Successfully completed the full migration of Hoosier Homes financial data into AppFolio and executed the first distribution cycle. Additionally, built VBA-enabled reporting, completing 37 out of 60 franchisee templates for BlueSkies.*
- ***Frontend & Platform:*** *Launched the Retina Summit 2026 website and completed the Trailique website. Implemented massive SEO upgrades across missing public routes to improve search visibility.*
- ***Content & Design:*** *A major win was the completion of 100+ unique neighborhood descriptions for the Dwellane project. On the design front, we saw a clear shift from quantity to quality, with advanced creative storytelling for BlueSkies.*
- ***Customer Success:*** *Closed all pending campaigns and delivered crucial benchmarking reports, stepping up client communication and structured workflows.*

Process & Infrastructure: Fixing the Friction

The appraisals and bi-weekly reports clearly showed that your efficiency is currently being constrained by systems, not your capability. We hear the feedback regarding overheating laptops, unstable local environments, and limited access to premium AI tools.

We are committed to clearing these hurdles. We have already begun upgrading hardware for some team members to resolve performance issues, and we are actively reviewing the remaining requirements to ensure everyone has the high-performance tools they need. If you are still facing hardware challenges, please know that we are looking into these one by one to ensure you can operate smoothly.

The next level of improvement will not come from pushing the team harder; it will come from fixing our infrastructure. Management is actively looking into resolving these tooling gaps so you can operate smoothly.

The Architects of Impact: Stars of the Month

Each month we recognize individuals whose contributions stand out not only for what they achieved, but for how they strengthened the teams around them.

Extra Milers of the Month

Nithiyashri (Senior Finance Executive)

End-to-End Ownership: Successfully led Hoosier Homes migration to AppFolio and ensured smooth execution of the first distribution under tight timelines.

Operational Stability: Took accountability for fixing excess owner distributions, management fee discrepancies, and ensuring readiness for future distributions.

High-Pressure Execution: Stepped up during peak workload, maintaining delivery momentum and ensuring no disruption to key financial processes.

Beyond the Call of Duty: Demonstrated exceptional commitment by working over the weekend to close migration gaps and stabilize operations.

DEVCANSOL

The April Horizon

As we finish up the final appraisal reviews, our focus for **April** is clear:

Wrap Up Appraisals: Completing the final feedback sessions and setting clear, actionable growth goals.
Embrace Upskilling: Integrating the daily 30-minute learning block into our team culture.
Tooling Support: Taking active steps to resolve the environment constraints raised this month.

Thank you all for an insightful, hard-working month. Let's keep evolving!

We are no longer just doing tasks; we are building systems.
